## Math proof examples with answers

Most students' struggles with higher-order math can be traced to gaps in knowledge of basic math facts. Scholastic Education developed Fastt math to help students close these gaps by developing math fluency through technology. What Is Fastt Math and Who Is It For? Technology motivates students. Fastt Math creators had this motivation in mind when developing the mathematics intervention software. Fastt Math utilizes the Fluency and Automaticity Through Systematic Teaching with Technology systems. Rationale for the program is based on the idea that humans are limited in how much information they can retain to solve problems. For mathematics, this implies that to be successful in higher-order math, students have to be able to retrieve basic math facts accurately and fluently, that is "automatically with understanding," according to Scholastic Foundation Research. How It Works Students in participating schools are assigned a Fastt Math account in second grade. Teachers may also identify students in subsequent grades who could benefit from the program. Participating students are assigned a username and password with which they can gain access to the program from school or home on a 24/7 basis. The lessons are divided into three groups: Fast facts are facts that the students have mastered, meaning it takes students an average of 1.25 seconds to answer accurately. Focus facts are facts that students are working on mastering. Study facts are facts that students will work on the next day. A review page allows students to "preview" the focus facts for the day's lesson. A typical lesson takes 10-15 minutes. Upon completing a lesson, students can choose from several timed games designed to review both Fast Facts and Focus Facts. Teachers track student progress and generate reports by the using the Scholastic Achievement Manager. Meeting the Common Core Standards In 2009, a task force led by then Arizona governor, Janet Napolitano, helped launch the Common Core State Standards, or Common Core. It outlines the skills and knowledge public school students must acquire for each grade level. The standards set by Common Core called for students to be fast and accurate in all four (mathematical) operations in order to succeed in higher-order math. Fastt Math Next Generation To help students meet Common Core Standards, Scholastic introduced Fastt Math Next Generation in 2012. New educator dashboards allow teachers to track progress towards Common Core goals. Games, such as STRETCH-To-Go are specifically designed to target Common Core standards, according to Scholastic Media News Room. Proven Effective Fastt Math gets results. Validated over several years with hundreds of students, results show that by using the technology "for 10 minutes a day most math-delayed students can develop fluency," reports Scholastic Research. An experiment involving students using Fastt Math versus two other groups receiving traditional instruction, found students using the technology achieved an average of 12-19 more facts than groups not using the technology. The technology also seems to help with retention. Students in the Fastt Math group were tested again after four months and only lost six facts. A Fastt Math evaluation conducted by EMU students seems to support Scholastic's results. Middle schoolers were tested and randomly placed in either an intervention group using Fastt Math or a control group receiving traditional instruction. After four weeks, students were tested again. Students at all levels showed improvement. Sixth graders showed the biggest improvement, with the intervention group mastering an average of 24.35 math facts versus the 7.46 facts mastered by the control group. Based on the results, evaluators recommended the program to continue.
